

Nexplanon[®]

(etonogestrel implant) 68mg

Radiopaque

The Ability to E-Prescribe NEXPLANON Is Now Available!

Actor Portrayal

Overview

We are excited to announce that you now have the option to e-prescribe NEXPLANON within your EMR system. This capability is intended to eliminate the need for completing and faxing a paper enrollment form. Note: You can still use the paper enrollment form if you prefer.

Prescription Process

The provider will e-prescribe NEXPLANON and select CSCN as the pharmacy name for ease of searching. Please note the CSCN has contracted with a valid licensed pharmacy that will receive the e-prescription. Their role is to determine pharmacy coverage (upon receipt of a prescription) and transfer that prescription to the appropriate specialty pharmacy, which will then ship NEXPLANON to your office.

To help locate the pharmacy name within your EMR, the following information may be helpful:

CSCN

6201 W Plano Pkwy Ste 400

Plano, TX 75093-4907

Phone Number: 844-639-4321

NCPDP/NABP: 5939484

NPI Number: 1407469471

- If possible, associating an appropriate diagnosis with the prescription may help facilitate coverage verification for the patient.
- Once the prescription is received, a notification that acknowledges receipt and contains a patient ID will be faxed to the office. If additional information is needed to complete the order, the pharmacy may follow up with your office to obtain that information verbally or via fax.

- **Concurrently, your patient will receive a text from 844-620-5904, notifying them that their prescription was received, and a link to provide their authorization electronically. It's very important that you let your patient know to look for this text and respond to it as soon as possible.**
- The pharmacy will determine if pharmacy coverage is available and which specialty pharmacy is required to dispense NEXPLANON, according to the patient's plan.

If pharmacy coverage is available

- If pharmacy coverage is confirmed, the pharmacy will transfer the prescription to the dispensing specialty pharmacy and send the office a fax confirming the transfer, which will include the specialty pharmacy's name and phone number. **The patient will also receive a notification that their prescription has been transferred, along with the specialty pharmacy's name and phone number.**
- The patient and/or the office may receive a call to schedule shipment from the specialty pharmacy after approximately 24-72 hours.

If pharmacy coverage is NOT available

- The patient will receive a text to provide their medical insurance information.
- If a specialty pharmacy can fill the prescription using their medical insurance, the process will be the same as it is in the "If pharmacy coverage is available" section above.
- If only Buy and Bill coverage is available through the patient's medical insurance, the office will receive a fax with that coverage information.

For any questions, please contact the Customer Support Center for NEXPLANON at 844-639-4321.
